

# WATER MANAGEMENT

Sibanye-Stillwater recognises water as a critical resource. The Company further considers its integrated approach to the management of its water footprint and its water systems infrastructure as a key component of its business strategy.

Our vision for Water Management can be described as '... creating value for all our stakeholders through the optimal management of the water resource and our water infrastructure, ensuring water safety, security and regulatory compliance through the effective use of knowledge and innovative technology.'

Sibanye-Stillwater is committed to achieving its Water Management vision through:

- providing water that is safe and secure (available) for its people, machinery, infrastructure and the environment
- ensuring that water abstracted, used, stored and / or discharged is compliant with legal and regulatory requirements
- responsible compliance and proactive incident management supported by enabling technologies and comprehensive reporting
- implementation of sound water management practices and systems, and the development of fit-for-purpose water standards and procedures that promote continual improvement
- hands-on management of water management contracts, thereby ensuring the efficient operation of water infrastructure
- developing and maintaining regional water strategies
- implementation of a sustainable mine closure strategy for effective socio-economic and environmental closure
- maintaining ring-fenced water accounts and holding users accountable for the use of water, and
- effective stewardship and promoting water awareness among all stakeholders.

Responsible water management is the duty of each Sibanye-Stillwater employee. The Sibanye-Stillwater leadership and line management commit to the implementation of this Water Management policy through effective and visible felt leadership on water management issues, and by creating a conducive operating environment as well as the allocation of appropriate resources.
