

OUR IMPACT : Entrepreneurial Development

# Bekkersdal Business Hive Renovation

thereby creating a more functional and enabling environment that fosters the growth and success of small businesses. Improvements include the renovation of the main hive structures, the installation of a dedicated community office, and the provision of office furniture and equipment. Repairs to the electrical system will also allow the facilities to operate reliably and efficiently.

Once complete, the revitalised hub will support both administrative and business functions. Community members will have access to office and boardroom spaces for organisational use. At the same time, the Rand West City Local Municipality will be able to activate and manage the site as a fully operational space for Small, Medium and Micro Enterprises (SMMEs).

Small businesses are at the heart of community growth—creating jobs, building skills, and strengthening local economies. To support this, the Foundation is investing in the renovation of the Bekkersdal Business Hive, a key commercial hub in Rand West City.

The project aims to empower local entrepreneurs by upgrading the infrastructure they rely on,

The Foundation remains committed to delivering a sustainable, community-focused asset that supports long-term economic inclusion and local resilience.
