# Construction of Loboneng Primary School Hall

A new school hall is under construction at Loboneng Primary School to enhance both classroom learning and extracurricular activities. Designed as a multi-purpose facility, the hall will feature a stage, kitchen, and ablution facilities, creating space for assemblies, performances, and broader community use.

The structure incorporates durable, learner-friendly materials, including vinyl flooring, insulated IBR

roofing, and secure access points. The kitchen and bathrooms are being fully equipped to support daily school operations and after-hours use.

While local water shortages have impacted construction, the project remains a priority and is expected to directly benefit learners, teachers, and the surrounding community upon completion.

Location:

Masilonyana Local Municipality

Investment:

**R2 million**

Status:

In progress

Implementing partner:

Sibanye-Stillwater

The new school hall will enhance both classroom learning and extracurricular activities.
